PROJECTS

Management System(CRUD). A Management System CRUD (Create, Read, Update, Delete) is a core set of operations essential for managing data within software applications. It enables users to create new data entries, retrieve existing information, update records as needed, and delete outdated or unnecessary data. These operations form the foundation for efficient data management and manipulation in various types of systems, ensuring data integrity and usability. (Try it here)

Notepad Application. A Notepad application project involves developing a simple yet functional text editor software. It allows users to create, edit, and save text documents, providing basic formatting options like font styles and sizes. Such projects typically focus on user interface design, file management functionalities, and ensuring smooth text editing capabilities..

Personal Portfolio Website. A Personal Portfolio website project showcases an individual's skills, work experience, and achievements in a visually appealing and interactive format. It serves as a digital portfolio for potential employers or clients to view the creator's capabilities and accomplishments.

EXTRA-CURRICULAR ACTIVITIES

- Participate in hackathons to solve real-world problems within a limited timeframe. They foster creativity, teamwork, and rapid prototyping skills.

- Enroll in relevant online courses or certifications (e.g., Coursera, edX, Udacity) to expand your technical knowledge and acquire new skills.
